PROMIGAS, A LEADING INTEGRATED ENERGY SERVICE CONGLOMERATE IN COLOMBIA AND PERU WITH OVER 50 YEARS OF EXPERIENCE

21 natural gas and electricity companies

BUSINESS AREAS

MIDSTREAM

- Leading transportation infrastructure in the Colombian coast region.
- G&P activities for E&P companies.
- Operates first and only LNG Import terminal in Colombia.

DOWNSTREAM

- Distribution of natural gas to industrial, commercial, natural gas vehicles (NGV) and residential customers through 5 distributors in Colombia and 2 in Peru.
- Distribution of energy in the west of Colombia.

ENERGY SERVICES

- Consolidation of energy services to accompany the energy transition and decarbonization of our clients.

LIQUEFIED NATURAL GAS - LNG

Reaffirming that our GNL storage and regasification infrastructure is vital in supporting electric power generation with natural gas.

WE OPERATE

Colombia's only LNG Terminal allowing the connection with LNG international sources strengthening National's energy system reliability

Infrastructure and capacity to receive small, medium and large-scale LNG vessels.

Ability to serve **60%** of thermal generation Colombia (**2,000 MW**).

A STRATEGIC ALLY FOR O&G PRODUCERS FOR OVER 20 YEARS

OUR CAPABILITIES

Natural Gas Processing

Experience in design, building, and operating processing plants under BOOT Contracts.

Experimented builders of natural gas pipelines , including directional and horizontal drilling (DHD). Operators of gas pipelines and interconnection lines.

Auto and Cogeneration

Experience developing custom made solutions for industry players considering auto and cogeneration.

O&M Services to Upstream Players
O&M model based on process safety and operational reliability.

SERVICES OFFERED TO UPSTREAM PLAYERS IN RECENT YEARS

+655 Mscfd

of processing plants. Mainly dehydration services, reaching up to 90%* of the gas produced in the northern coast of Colombia.

31.700 HP of Compression Capacity.

410 Km

of constructed pipelines, including a HDD of 3.4 Km in 16"

~3,000 km of O&M services to pipelines.

57 MW

of generating capacity of Auto and Cogeneration.

Integrated solutions for industry and power generation

ENERGY SOLUTIONS

We accomplished expansion of our portfolio to a 65% capacity enhancement , and in doing so , we achieved our strategy: to connect people through energy sources and reliable, safe and innovative services.

Business lines focused on Distributed Solar Energy and Auto and Cogeneration.
We lay the foundations to expand our supply in energy efficiency and *carbon management solutions*.

Portfolio of generation projects of:

WE INNOVATE TO TRANSFORM OURSELVES

We drive the energy transition and transformation of our businesses

Our innovation builds the bridge between successful businesses today and our ability to win in a sustainable and secure energy future

Our Innovation Focus

New energy sources

Bioenergy, hydrogen, synthetic natural gas, and ammonia

Low carbon technologies

Storage, mobility, districts, capture and transport of CO₂, and solar thermal systems

Digital Innovation

Extended reality, analytics, and AI, GenAI

Innovation and Business Core

Customer experience, decarbonization of operations, safety and efficiency, new business models

Main achievements in 2024

Launch of new electric energy **storage** service, with two commercial closures.

Growth of the **new energetics** portfolio from 12 to 66 prospects in Colombia and Peru.

COP 15.9 billion in savings from the implementation of 61 **bottom-up innovation** initiatives.

9th company in **Colombia in innovations**, second among energy companies, and first among utility companies.

OUR INVESTMENT GENERATES NEW KNOWLEDGE AND DEVELOPS CAPABILITIES FOR THE FUTURE

Impact of hydrogen **blending** on aging natural gas networks.

Our in-house developments in **micro-liquefaction**, decarbonization of operations, and optimization of solar systems PV.

+10 R&D projects with universities and research centers, supporting the training of 12 national talents in masters and doctorates programs.

COP 246 billion

Expenditure and investment in R&D and Innovation

COP 673 billion

Savings and Revenue derived from Innovation.

WE INITIATED THE DIGITAL TRANSFORMATION OF OUR COMPANIES

At December 2024, our board of directors approved the **Roadmap for Digital Transformation** and AI, with horizon 2025-2028.

Four digital products came into operation in 2024, generating savings of +COP 3.5 billion/year with **analytics, robotics, AI, and extended reality technologies**.

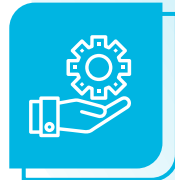

Figures from Fiscal year 2024

COMPREHENSIVE MANAGEMENT WITH A SUSTAINABLE APPROACH

As an organization, we are committed to undertaking actions that contribute to the United Nations Sustainable Development Goals (SDGs). We have prioritized the following actions:

We foster sustainable development, and based on ethics and transparency, we act ethically and responsibly to tackle opportunities and mitigate.

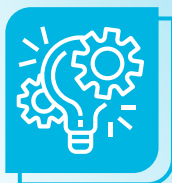

We envision sustainability with a cross-sectional approach, seeking to generate lasting economic, social, and environmental value amongst our stakeholders.

For our volunteer work, we have defined the following priority SDGs for Promigas:

DECARBONIZATION STRATEGY

New Roadmap for the reduction of 50% of GHG emissions in Scopes 1 and 2 and a dedicated part of Scope 3 by 2028, and net zero emissions by 2040 based on 2021 emissions.

2023 CARBON FOOTPRINT

Scope 1: 176,717 tCO₂e

Scope 2: 18,395 tCO₂e

Scope 3: 3.8 M tCO₂e

Total: 4 M tCO₂e

In 2023, 25,000 tonnes of CO₂ were reduced, exceeding the established goal of 10,000, through strategic actions carried out, as part of our roadmap.

0

Fines
or environmental
sanctions

POSITIVE ENVIRONMENTAL FOOTPRINT

Environmentally responsible management is one of our purposes, this includes the commitment to the protection of biodiversity, improvement and efficiency in the use and treatment of natural resources, and the management of climate change and its effects, in alignment with the Principles of the Global Compact and the SDGs.

BIODIVERSITY

- 1,074.53 hectares compensated in strategic ecosystems.
- 560.63 hectares of tropical dry forest under conservation or restructuring schemes in search of net profit.

We executed the Mission La Guajira project, with which we have sought to benefit more than 3,000 families (around 25,000 beneficiaries) with water and energy solutions adapted to the traditions of the Wayúu ethnic group.

STRATEGIC SOCIAL INVESTMENT

Our commitment to the sustainable development
of communities

We are part of the communities where we operate, generating opportunities that improve the quality of life of its inhabitants and strengthen the sustainability of their environment.

Our High Impact Social Investment Strategy includes technical training and life skills, through four programs: More Youth Employment, More Entrepreneurship, More Productive Communities, and More Sustainable Territories.

OUR VALUE PROPOSITION

Leadership and experience in the natural gas and liquefied natural gas (LNG) business in Colombia and Peru.

Development of energy solutions together with the industry to improve its competitiveness and reduce its carbon footprint.

Development of digital solutions and prototypes that allow connecting to businesses with cutting-edge digital technologies, capturing new value, and strengthening the quality of our service.

Excellent relationships with our stakeholders, including communities, customers, suppliers, and the state. Experience in the management of users in adverse economic conditions, with the consequent improvement of living conditions in marginal populations.

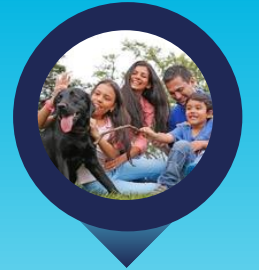

Experience in natural gas regulation. Articulation of strategies with the Government to increase gas service coverage (massification, cross subsidies, regional gas pipelines, among others).

Leaders in innovation to strengthen our value proposition to customers and other stakeholders, developing businesses that allow us to achieve our goals and contribute to the transition towards a decarbonized economy.

Large-scale conservation in the Colombian Caribbean that seeks to protect more than 100,000 hectares of strategic ecosystems through the Co2Rozo project.

Financiación no bancaria para personas sin acceso a la banca.

We work on the solid basis of our values: excellence, integrity, and solidarity.
